

The 5th kysoukai fund

Medical, Dental and Pharmaceutical Course

Recruiting
students

eligible for the grant

Create the foundation here for researchers who will compete on the global stage

A grant to learn how to deliver medical, dental,
and pharmaceutical research seeds to society.

The grant can be used for various expenses, including travel and accommodation for international conferences, researcher visits, and learning opportunities at sites of social implementation.

Immerse yourself in domestic and international settings to learn about the social implementation of research outcomes from your own perspective.

Gain practical experience in clinical practice, regulatory affairs, business feasibility, global trends, and the entire process of bringing research to society
—accelerating your growth.

If you want to share your research results with the world, take the first step here.

Eligibility

Students enrolled in doctoral or master's programs at Kyushu University who aim to obtain a Ph.D. or M.D. in scientific fields such as medicine, pharmacy, chemistry, biology, engineering, agriculture, dentistry, AI and machine learning, or computer science.

(International students, those currently studying abroad or planning to study abroad, and those on a leave of absence are all eligible.)

Number of grantees

Around **5** students

Grants

0.5-1 million yen per year will be provided

Application period

2026.1.7 Wed. - 2.24 Tue.
Until 5:00 PM
